COMPANY HISTORY:

RE Enterprises was originally known as R.E. Technologies which opened in 1983 manufacturing electronic testing and control devices for the HVAC industry. In 2000, Chris Santucci became Operations Manager and Team Manager for R.E. Technologies and the R.E. Technologies/Carl Edwards USAC Silver Crown Race Team. Shortly thereafter, the machining and fabrication division was created. In 2007, Racing Eclipse was created as the retail and auto racing services division of R.E. Technologies featuring a retail store specializing in auto racing parts and supplies.

In 2010, Racing Eclipse also became a *Goodridge Technical Center*, featuring the latest in lightweight, state of the art Kevlar and PTFE motorsports hoses and fittings, while also offering a complete inventory of AN adapters and the industry standard "pushlock" and stainless steel braided hoses and fittings.

In January 2013, R.E. Technologies and Racing Eclipse merged to become RE Enterprises and now, with their complete CNC capabilities, RE Enterprises can also manufacture anything from one-off prototypes to full scale production runs.

Today RE Enterprises operates out of a modern 17,000 square foot facility in Northeast Memphis. RE Enterprises has earned a reputation for quality for all of its operations. Chris and his staff have honed their work ethics as both machinists and auto racing mechanics. Winning is important in each discipline.

Vince Lombardi once said:

"The will to excel and the will to win, they endure.

They are more important than any events that occasion them"

We agree completely!
